New Website Release – *Hacker, Johnson & Smith PA*

Hacker, Johnson & Smith PA is a firm of certified public accountants that was founded in 1974 and has grown to approximately fifty people primarily due to their excellent reputation for providing superior service on a timely basis. Their services are generally limited to providing independent audit services and tax services for those audit clients. They understand that whether or not you're an entrepreneur starting a new business or a publicly held company your needs are similar. The team at **Hacker, Johnson and Smith** has developed an expertise in a number of different industries, including SEC reporting public companies. Their philosophy remains quite simple, to become thoroughly familiar with your operations so they can provide the most efficient and cost effective audit and tax services. Like **K.Tek**, they believe this "***personal touch***" separates them from other firms and they urge you to seek the opinion of those they serve.

For this particular project, the client's website was over 10 years old and didn't represent the firm and its state-wide prominence in their industry. **K.Tek** developed a website to showcase not only their long standing expertise in the Banking, Property and Casualty Insurance, Employee Benefit Plans and Public Company Auditing and Tax Services, but also their long history of personal attention and innovative approaches to client solutions.

We are proud to be a partner of **Hacker, Johnson & Smith** and look forward to a long and trusting relationship with them. You can learn more about **Hacker, Johnson and Smith** by visiting their website at: www.hackerjohnson.com
